Art Unit: 2811

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 9-12, drawn to a semiconductor device, classified in class 257, subclass 119.

Group II, claim(s) 13-16, drawn to a method of using a semiconductor device, classified in class 324, subclass 388.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is directed to a structure of a semiconductor device. However, Group II is directed to a method of using a semiconductor device in an ignition system of an internal combustion engine. Although Groups I and II teach the same semiconductor device, Group I never discloses the semiconductor device is included in an ignition system of an internal combustion engine. Therefore, Group I lacks the ignition system of the internal combustion engine. Since Groups I and II are directed to two different inventive concepts, they are not relate to a single general inventive concept under PCT Rule 13.1.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
